*The data are calculated from 'yes' responses to two questions:1)During the past twelve months have you had pain or stiffness in or around a joint?2)Were these symptoms present on most days for at least one month? Response is generalized to the state population

#Use caution in interpreting data for total respondents less than 50. N = Cell Size, NH = Non-Hispanic, % = Percentage, C.I.(95%) = Confidence Interval (at 95 percent probability level).

Percentages are weighted to population characteristics.

Unless stated differently above, Missing, 'Don't know', and Refused responses are excluded.
